

Attention Parents:

One current issue hampering all schools across America at this time is the use of electronic cigarettes/vape devices. Children under the age of 18 are able to purchase these devices online. In an effort to better equip parents, we would like to raise awareness and help parents identify potential risks to their children's health. A very popular vape device used at the current time is called a "JUUL". This device resembles a USB flash drive. It can be charged by being plugged into a computer. To an individual who has never seen one before, it simply appears to be a USB flash drive. However, this device could contain nicotine or THC, the illegal ingredient in marijuana. Pictured below, is a JUUL device along with the pods that are inserted into the unit. If you discover any items of this nature, please confiscate them and discuss this with your child. If you have further questions or concerns, please feel free to contact Midd-West High School.

Pictured below is another example of a vape device used by students.
